Project Application

For participation in the program of assistance to institutions for children

1. Name of organization, address:

Department of Pediatric Pathology of the Regional Association "Family and Health" of the town of Gorlovka (Department of Public Health of the Gorlovka City Counsel), located at the address 26-a Lenina Street, Gorlovka-84601, Donetsk Region, Ukraine, Telephone: 80 6242 4-30-13.

2. Name of [project] Supervisor: Nafaned, Tatiana Gennad'evna.

3. Number of children at the time of the application: 21.

4. Brief description of problems:

Currently, a major problem in the Department of Pediatric Pathology is the lack of at least two syringe pumps as well as a special surgical monitor for reanimation of newborns. Most of the newborns who are placed in our unit are in need of reanimation followed by a complex and intensive treatment. Although our doctors and nurses are on duty for 24 hours and are constantly fighting for the lives of the newborns in our care, their task is very difficult due to the shortage of high quality medical equipment.

The department is in dire need of new and comfortable changing tables: the old ones are completely worn out and practically falling apart.

We also need a refrigerator for storing medicines.

5. Approximate cost of 19 changing tables: $1440 \text{ hryvnas} \times 19 = 27360 \text{ hryvnas}$ (USD $180 \times 19 = \text{USD } 3,420$).

6. Approximate cost of a surgical monitor for the reanimation of newborns: 51200 hryvnas – USD 6,400.

7. Approximate cost of two syringe pumps: 18400 hryvnas – USD 2,300.

8. Approximate cost of the refrigerator: 9600 hryvnas – USD 1,200.

Project Timetable: We pledge to acquire the necessary equipment as soon as the funds are received. We are agreeable to financing in stages. The changing tables are the priority.

Head of the Department
